SUMMARY

Senior Flutter Developer with 7+ years of experience and 20+ production apps shipped to the App Store and Google Play. I lead mobile teams, own the architecture, and turn product requirements into fast, stable, maintainable apps for Android, iOS and Web from one Flutter codebase. I work in Scrum teams and use AI-assisted development (Claude Code, ChatGPT) to prototype, refactor and test faster. Open to Senior and Lead Flutter / Mobile roles: remote, hybrid or on-site, and open to relocation.

EDUCATION

BS Computer Science, Arid Agriculture University, Rawalpindi 2014 - 2018

SKILLS

- **Languages/Frameworks:** Dart, Flutter, FlutterFlow, Kotlin, Swift, PHP, JavaScript, HTML/CSS
- **Architecture:** Clean Architecture, MVVM, MVC, SOLID Principles
- **State Management:** BLoC / Cubit, Riverpod, Provider, GetX
- **Backend/Cloud:** .NET Core (Web APIs), Firebase (Auth, Firestore, Storage, Functions, FCM), Supabase, AWS, Azure
- **Database:** SQLite, Hive, MongoDB, Shared Preferences
- **APIs & Real-time:** REST APIs, GraphQL, WebSocket, SignalR, Twilio, Agora SDK, JSON Parsing, Interceptors
- **UI/UX:** Material Design, Cupertino, Custom Animations, Responsive UI
- **Testing:** Unit Tests, Widget Tests, Integration Tests
- **Tools:** Android Studio, VS Code, Xcode, Git, GitHub, Postman
- **CI/CD:** GitHub Actions, Codemagic, Fastlane
- **AI:** AI-assisted development with Claude Code and ChatGPT; on-device ML with Firebase / Google ML Kit
- **Process:** Scrum (daily stand-ups, sprint planning, task estimation), code reviews, mentoring
- **Other:** Payment Gateways, Google Maps, Push Notifications, Apple Health

EXPERIENCE

Senior Flutter Developer **Jan 2022 - Present**

2B VisionTechnologies *Lahore, Pakistan*

- End-to-end leadership of 10+ production Flutter applications in healthcare and logistics – from architectural design and development to App Store/Play Store deployment and post-launch maintenance.
- Engineered a white-label phlebotomy platform that automated manual specimen workflows, GPS-based mileage billing, and order tracking – replacing paper-based processes and removing most manual billing errors.
- Mentored 3 junior Flutter developers in BLoC, MVVM, and Clean Architecture through code reviews and structured training, reducing post-release bugs and speeding up delivery.
- Integrated real-time features with SignalR, Twilio and WebSocket, plus Apple Health and Flutter Web builds from the same codebase.
- Set up CI/CD with GitHub Actions, Codemagic and Fastlane, with unit and widget tests before every release.

- Collaborated with backend, product, and QA teams to define API contracts in Scrum (daily stand-ups, sprint planning and task estimation), delivering stable releases on schedule.

Flutter Developer **Apr 2021 - Jan 2022**

Sigi Technologies *Lahore, Pakistan*

- Developed 5+ production mobile applications for e-commerce, POS, and logistics clients using Flutter, REST APIs, and Firebase.
- Engineered real-time features including live order tracking, chat systems, and push notifications using Firebase and WebSockets.
- Integrated Google Maps and navigation flows for delivery apps, giving drivers faster, more accurate routes.
- Structured apps with GetX and BLoC so bugs were easier to trace and fix, keeping codebases maintainable.
- Delivered features end-to-end in a Scrum team (daily stand-ups, sprint planning and task estimation), from UI implementation to API integration and testing.

Flutter Developer | Website Developer **Mar 2019 - Apr 2021**

Globulars *Lahore, Pakistan*

- Developed 8+ production Flutter applications from concept to deployment in the fintech, media streaming, and service booking domains.
- Built a digital wallet app with multi-currency support, gift cards, loyalty programs, cryptocurrency trading, and MasterCard integration.
- Created a live TV streaming platform with multi-player support (YouTube, Vimeo), subscription management, and social media authentication.
- Engineered POS and e-commerce applications featuring real-time transactions, inventory management, and secure payment processing.
- Cut load times noticeably by moving to BLoC and GetX state management and caching API responses.
- Managed end-to-end deployment on Google Play Store and Apple App Store, including store compliance and post-launch fixes.

KEY PROJECTS

- **TMIT PHLEBO** – Phlebotomist workflow application featuring order handling, specimen collection tracking, Google Maps navigation with polylines, distance calculation, and MVVM + BLoC architecture.
- **SmartPGX** – Genomic insights platform enabling patients to manage medication history, view drug-interaction severity reports, and invite doctors for reviews. Built with HIPAA-compliant architecture and BLoC state management.
- **TrueMediT Patient Portal** – Comprehensive medical portal for tracking records, lab reports, telemedicine (Agora), infectious disease ordering, requisition insertion, and Firebase push notifications.
- **Req Flow** – Global requisition management system enabling creation of blood, infectious disease, and specialized test orders across multiple healthcare portals. Supports bulk check-in via manual entry or barcode scanning, providing a unified workflow solution.
- **Ride On Wheel (User/Driver)** – Food and grocery delivery platform with real-time order tracking, chat, scheduled ordering, Google Maps navigation, and FCM notifications using GetX.

- **WiseUp Wallet** – Multi-feature digital wallet supporting Visa/MasterCard payments, gift cards, loyalty programs, money transfers, and mobile top-ups.
